

Thunnus UK: The first year of research on Atlantic bluefin tuna off southwest UK

Plans for 2019

2019

- The **sightings scheme will be continue to operate**; happy to receive your sightings (whenever they're from, historic records too).
- We will be **satellite tagging in 2019** (as in 2018); ~20 tags, multiple types
- **Satellite tagging will commence earlier** than last year.
- Plans for **hiring vessels** will be released later in the next few months (similar to last year using a tender process).
